

# Muhammad Wahab Khan

Software Engineer

+92 306 5351011 | [mwahab.1611@gmail.com](mailto:mwahab.1611@gmail.com) | [Github](#) | [Linkedin](#) | [Website](#)

## Education

### BS in Computer Science

Sep 2018 – Sep 2022

International Islamic University

Islamabad, Pakistan

Final Year Project: E-Rental - A mobile application to automate car rental operations. [[Dissertation](#)] [[GitHub](#)]

Supervisor: Dr. Qaiser Javed

## Teaching Experience

### • Junior Lecturer | Iqra University Islamabad

Jul 2024 – May 2025

- Courses (labs) taught:
  - CMC111 - Programming Fundamentals. (Spring 2025, Fall 2024)
  - CMC251 - Data Structure & Algorithms. (Spring 2025, Summer 2024)
  - CMC331 - Database Management System. (Spring 2025, Fall 2024)
  - GER111 - Application of Information & Communication Technology. (Spring 2025)
  - CMC123 - Digital and Logic Design. (Spring 2025)
  - CMC112 - Object Oriented Programming. (Fall 2024)
  - CSC333 - Introduction to Python. (Summer 2024)

## Work Experience

### • Software Engineer | FIVERR

Jul 2024 – Present

May 2021 – Jan 2024

- Delivering full-stack web development, database design, and software solutions to global clients across 300+ projects.
- Designing and deploying scalable, high-performance applications using modern frameworks and APIs.
- Collaborating with clients to translate requirements into functional systems, ensuring quality, usability, and on-time delivery.

### • Web Developer | Dynamics 360

Mar 2024 – Jun 2024

- Upgraded and optimized the company's content management system, improving performance and usability.
- Enhanced website functionality and resolved navigation and URL structure issues.
- Developed a custom portfolio website to showcase company projects and services.

### • Web Developer | Centangle Interactive

Mar 2023 – Sep 2023

- Developed a data management system for GIZ, replacing manual Excel-based workflows with an automated web solution.
- Built employee and department management systems using PHP and MySQL.
- Designed an interactive sales dashboard for tracking products, sales, and client feedback.

### • Trainee (MERN) | QC360

Dec 2022 – Feb 2023

- Gained hands-on experience in full-stack development using MongoDB, Express.js, React, and Node.js.
- Developed an e-commerce application with integrated frontend and backend functionality.
- Implemented CRUD-based systems to improve data organization and accessibility.

## Volunteer Experience

### • Section Leader | Stanford University | [[Link](#)]

Apr 2026 – May 2026

- Selected as a Section Leader for Stanford University's Code in Place 2026 program.
- Lead weekly sections and teach **CS106A - Introduction to Python** to a globally diverse cohort of students.

## International Hackathons and Coding Competitions

### • CS50x Puzzle Day 2026 @Harvard | [[Link](#)]

- Led a team of four to solve all 10/10 problems.

- **M(IT)<sup>2</sup> Winter 2025 @MIT** | [\[Link\]](#)
  - Ranked 58th among 192 global participants.
- **Calico Fall 2025 @University of California Berkeley** | [\[Link\]](#)
  - Competed individually in a team-based contest, ranked 358th among 2,231 participants and 1,092 teams from 38 countries and 41 U.S. states.
- **Meta Hacker Cup 2025 @Meta** | [\[Link\]](#)
  - Ranked 130th among 397 teams nationally.
- **Calico Spring 2025 @University of California Berkeley** | [\[Link\]](#)
  - Our team ranked 116th among 1816 contestants and 820 teams (48 countries and 30 U.S states).
- **M(IT)<sup>2</sup> Spring 2025 @MIT** | [\[Link\]](#)
  - Ranked 206th among 1540 contestants from 67 countries (541 cities and 236 states).
- **CS50x Puzzle Day 2025 @Harvard** [\[Link\]](#)
  - Led a team of three to solve 9/9 complex problems.
- **Raise your Hack Hackathon** | [\[Certificate\]](#) [\[GitHub\]](#)
  - Developed an AI-powered Smart Contract audit tool for Qubic.
  - Automatically detects common vulnerabilities generating comprehensive security reports with actionable recommendations.
- **Execute AI Genesis Hackathon** | [\[Certificate\]](#) [\[GitHub\]](#)
  - Muwakkil - AI Legal Assistant addresses the challenges faced by SMEs in the UAE's complex dual system.
  - **Top finalist** among 165 global teams & 1500+ participants (too close to win for AI/ML API). [\[Link\]](#)

## Projects

---

- **AI Vulnerability Assessment** | [\[GitHub\]](#)
  - Set up a containerized environment (Docker, Ollama) to evaluate LLMs.
  - Used Garak for prompt-injection/jailbreak testing.
  - DependencyCheck for dependency vulnerabilities, and Giskard for systematic adversarial evaluation.
  - Produced vulnerability reports for Microsoft Phi-3-Mini and open-source LLMs.
  - **Credit:** Mikko Lempinen
- **Dynamics360 Dashboard** | [\[GitHub\]](#)
  - Developed a dynamic admin dashboard using PHP and MySQL to manage company data through an intuitive web interface.
  - Replaced manual database operations (phpMyAdmin) with automated CRUD functionalities, improving efficiency and data integrity.
  - Designed backend logic to enable seamless data management, including secure add, update, and delete operations.
- **Digi64** | [\[Link\]](#)
  - Developed a professional company website, highlighting services in web, mobile, and desktop application development.
  - Implemented a responsive, user-focused design to ensure seamless functionality across desktops, tablets, and mobile devices.
  - Enhanced site structure, navigation, and UI/UX to improve accessibility and overall user engagement.
- **ERP Website** | [\[GitHub\]](#)
  - Developed a full-stack ERP web application, enabling management of products, raw materials, suppliers, workforce, and operational workflows.
  - Designed and implemented modular system architecture with role-based access control, ensuring secure and scalable data handling across different user roles.
  - Built dynamic dashboards and database-driven features to streamline inventory tracking, resource allocation, and business process automation.

- **TextILES** | [[GitHub](#)]
  - Developed a full-stack web application using HTML, CSS, Bootstrap, JavaScript, PHP (Yii2), and MySQL for digitizing organizational workflows.
  - Replaced manual Excel-based processes with an automated, user-friendly system to improve efficiency and data management.
  - Implemented a dynamic dashboard with data visualizations and graphs to support real-time insights and decision-making.
  - Integrated role-based access control (RBAC) using Yii2 to enforce secure, permission-based access across different user roles.

## **Skills**

---

- **Programming Languages:** Python, Java, C++, PHP, JavaScript, SQL, Assembly (MARIE)
- **Web & Frameworks:** HTML, CSS, Bootstrap, React, Express.js, Django
- **Databases:** MySQL, SQLite, MS Access
- **Tools & Technologies:** Git, GitHub, Docker

## **Honors and Achievements**

---

- **LeetCode** | Solved **250+** Data Structure and Algorithms problems. [[Link](#)]
- **CSC** | Selected for Fully Funded CSC Scholarship at Wuhan University (**Top 0.5%/1500+**). [[Link](#)]
- **Python Instructor @Fiverr** | Highly Ranked, Top Rated (4.9), May 2021 - Jan 2024.
- **International Islamic University** | Recipient of Merit Scholarship during Undergraduate, Jan 2019.
- **Quaid-i-Azam University** | Recipient of Prime Minister Laptop during Undergraduate, July 2018.
- **Punjab College** | Recipient of Merit Scholarship during high school, Aug 2015.
